## RELEVANT PROJECTS

### Barrel Locations Map

- Using fullstack JS, created website for mapping barrels
- Parses Google Sheets into JSON
- Stores barrel locations in MongoDB
- Maps out locations with stats and easy editing

### Personal Website

- Built out with React.js

### Dictionary/Spellchecker

- Implemented in C
- Created with memory constraints
- Loads chosen dictionary and stores in trie nodes
- Loads chosen text and compares each word with dictionary

- Frees memory on completion

#### **Blackjack Game**

- Made in Ruby
- Simulates blackjack table in the command line
- Players can compete against a computer, or run a demo round

#### **Where Module**

- Made in Ruby
- Searches through an array of hashes given Regexp or exact parameters
- Returns all matching hashes

## **WORK EXPERIENCE**

### **Rackhouse Operator, Few Spirits**

Evanston, IL--- October 2016-Present

- Catalogued barrel locations
- Created website to parse legacy spreadsheets into easier to use interface for editing barrel locations
- Delegated tasks to team members
- Responsible for warehouse inventory
- Transported barrels, totes, and product between warehouses
- Bottled product
- Troubleshoot the bottling and labeling machines
- Harvested and blended barrels of whiskey
- Filtered whiskeys and gins
- Proofed and cut down alcohol
- Arranged single barrel tastings with notes
- Operated forklift

### **Production/Delivery, Bow Truss**

Chicago, IL---- February 2016-October 2016

- Delivered coffee to cafes and wholesale customers
- Created routes and navigated Chicago streets
- Weighed and blended coffees
- Packed coffee for orders and shipments
- Managed delivery schedule and times
- Trained employees to aid me in deliveries
- Ensured customers were happy and passed on any issues
- Regularly cleaned the warehouse and machines
